Definitions / Discussion of Non-GAAP Financial Measures:

Funds from Operations (FFO): We calculate FFO in accordance with the standards established by the National Association of Real Estate Investment Trusts (“NAREIT”). FFO represents net income (loss) (computed in accordance with GAAP), excluding gains (or losses) from sales of depreciable operating property, gains (or losses) from sales of assets incidental to our business, impairment losses of depreciable operating property or assets incidental to our business, real estate related depreciation and amortization (excluding amortization of deferred financing costs and amortization of above/below-market lease intangibles) and after adjustments for unconsolidated joint ventures. Management uses FFO as a supplemental performance measure because, in excluding real estate related depreciation and amortization, gains and losses from property dispositions, other than temporary impairments of unconsolidated real estate entities, and impairment on our investment in real estate, it provides a performance measure that, when compared year over year, captures trends in occupancy rates, rental rates and operating costs. We also believe that, as a widely recognized measure of performance used by other REITs, FFO may be used by investors as a basis to compare our operating performance with that of other REITs. However, because FFO excludes depreciation and amortization and captures neither the changes in the value of our properties that result from use or market conditions nor the level of capital expenditures and leasing commissions necessary to maintain the operating performance of our properties, all of which have real economic effects and could materially impact our results from operations, the utility of FFO as a measure of our performance is limited. Other equity REITs may not calculate or interpret FFO in accordance with the NAREIT definition as we do, and, accordingly, our FFO may not be comparable to such other REITs’ FFO. FFO should not be used as a measure of our liquidity and is not indicative of funds available for our cash needs, including our ability to pay dividends. FFO should be considered only as a supplement to net income computed in accordance with GAAP as a measure of our performance. A reconciliation of net income, the nearest GAAP equivalent, to FFO is set forth below.

Core Funds from Operations (Core FFO): We calculate Core FFO by adjusting FFO to exclude the impact of certain items that we do not consider reflective of our core revenue or expense streams. These adjustments consist of (i) acquisition expenses, (ii) loss on extinguishment of debt, (iii) the amortization of the loss on termination of interest rate swap, (iv) preferred stock redemption charges and (v) other amounts as they may occur. Management believes that Core FFO is a useful supplemental measure as it provides a more meaningful and consistent comparison of operating performance and allows investors to more easily compare the Company's operating results. Because certain of these adjustments have a real economic impact on our financial condition and results from operations, the utility of Core FFO as a measure of our performance is limited. Other REITs may not calculate Core FFO in a consistent manner. Accordingly, our Core FFO may not be comparable to other REITs' Core FFO. Core FFO should be considered only as a supplement to net income computed in accordance with GAAP as a measure of our performance. A reconciliation of FFO to Core FFO is set forth below.

Reconciliation of Net Income Attributable to Common Stockholders per Diluted Share Guidance to Company share of Core FFO per Diluted Share Guidance:

The following is a reconciliation of the Company's 2021 guidance range of net income attributable to common stockholders per diluted share, the most directly comparable forward-looking GAAP financial measure, to Company share of Core FFO per diluted share.

	2021 Estimate	
	Low	High
Net income attributable to common stockholders	\$ 0.53	\$ 0.56
Company share of depreciation and amortization	1.03	1.03
Company share of gains on sale of real estate	(0.10)	(0.10)
Company share of FFO	\$ 1.46	\$ 1.49
Add: Series A Preferred Stock redemption charge ⁽¹⁾	0.02	0.02
Company share of Core FFO	<u>\$ 1.48</u>	<u>\$ 1.51</u>

(1) Upon redemption of the outstanding Series A Preferred Stock on August 16, 2021, the Company will incur an associated non-cash charge of approximately \$3.3 million, as a reduction to net income attributable to common stockholders for the original related issuance costs.

Net Operating Income (NOI): NOI is a non-GAAP measure, which includes the revenue and expense directly attributable to our real estate properties. NOI is calculated as rental income from real estate operations less property expenses (before interest expense, depreciation and amortization). We use NOI as a supplemental performance measure because, in excluding real estate depreciation and amortization expense and gains (or losses) from property dispositions, it provides a performance measure that, when compared year over year, captures trends in occupancy rates, rental rates and operating costs. We also believe that NOI will be useful to investors as a basis to compare our operating performance with that of other REITs. However, because NOI excludes depreciation and amortization expense and captures neither the changes in the value of our properties that result from use or market conditions, nor the level of capital expenditures and leasing commissions necessary to maintain the operating performance of our properties (all of which have a real economic effect and could materially impact our results from operations), the utility of NOI as a measure of our performance is limited. Other equity REITs may not calculate NOI in a similar manner and, accordingly, our NOI may not be comparable to such other REITs' NOI. Accordingly, NOI should be considered only as a supplement to net income as a measure of our performance. NOI should not be used as a measure of our liquidity, nor is it indicative of funds available to fund our cash needs.

NOI should not be used as a substitute for cash flow from operating activities in accordance with GAAP. We use NOI to help evaluate the performance of the Company as a whole, as well as the performance of our Stabilized Same Property Portfolio. A calculation of NOI for our Stabilized Same Property Portfolio, as well as a reconciliation of net income to NOI for our Stabilized Same Property Portfolio, is set forth below.

Cash NOI: Cash NOI is a non-GAAP measure, which we calculate by adding or subtracting from NOI: (i) fair value lease revenue and (ii) straight-line rent adjustments. We use Cash NOI, together with NOI, as a supplemental performance measure. Cash NOI should not be used as a measure of our liquidity, nor is it indicative of funds available to fund our cash needs. Cash NOI should not be used as a substitute for cash flow from operating activities computed in accordance with GAAP. We use Cash NOI to help evaluate the performance of the Company as a whole, as well as the performance of our Stabilized Same Property Portfolio. A calculation of Cash NOI for our Stabilized Same Property Portfolio, as well as a reconciliation of net income to Cash NOI for our Stabilized Same Property Portfolio, is set forth below.

Stabilized Same Property Portfolio:

Our 2021 Stabilized Same Property Portfolio is a subset of our consolidated portfolio and includes properties that were wholly owned by us for the period from January 1, 2020 through June 30, 2021, and excludes properties that were acquired or sold during the period from January 1, 2020 through June 30, 2021, and properties acquired prior to January 1, 2020, that were classified as current or future repositioning, redevelopment or lease-up during 2020 or 2021 (unless otherwise noted), which we believe significantly affected the properties' results during the comparative periods. As of June 30, 2021, our 2021 Stabilized Same Property Portfolio consists of 195 properties aggregating 24,721,010 rentable square feet.

Properties and Space Under Repositioning: Typically defined as properties or units where a significant amount of space is held vacant in order to implement capital improvements that improve the functionality (not including basic refurbishments, i.e., paint and carpet), cash flow and value of that space. A repositioning is considered complete once the investment is fully or nearly fully deployed and the property is marketable for leasing. We consider a repositioning property to be stabilized at the earlier of the following: (i) upon reaching 90% occupancy or (ii) one year from the date of completion of repositioning construction work.

Net Debt to Enterprise Value: At June 30, 2021, we had consolidated indebtedness of \$1.2 billion, reflecting a net debt to enterprise value of approximately 12.0%. Our enterprise value is defined as the sum of the liquidation preference of our outstanding preferred stock and preferred units plus the market value of our common stock excluding shares of nonvested restricted stock, plus the aggregate value of common units not owned by us, plus the value of our net debt. Our net debt is defined as our consolidated indebtedness less cash and cash equivalents.

In-Place Annualized Base Rent (ABR): Calculated as the monthly contractual base rent (before rent abatements) per the terms of the lease, as of June 30, 2021, multiplied by 12. Includes leases that have commenced as of June 30, 2021 or leases where tenant has taken early possession of space as of June 30, 2021. Excludes tenant reimbursements.
